Please type or print clearly

I. Mr. _____ Age _____
Ms. _____ (First) (Middle) (Last)

Home Address _____ Phone _____

City _____ State _____ Zip _____

College Address _____ Phone _____

City _____ State _____ Zip _____

E-mail address _____

II. College currently attending _____

Engineering Major _____. Cumulative Grade Point Average (Attach Transcript) _____

Total Credit Hours you will complete by June 1, 2020 _____ Expected Graduation Date _____

If transferring, to which college _____

Number of credit hours required to graduate _____ Full or Part Time Student _____

III. Fire Protection is a diverse field. For example; Civil Engineers design the water distribution systems that are used to fight fires. Mechanical Engineers design the sprinkler systems that are used to control fires in buildings. Electrical Engineers design fire alarm systems that are used to discover and locate fires. Industrial Safety Engineers analyze the risk of fire and advise building owners of prevention methods. Please attach a short essay (no longer than one page) describing how you might utilize fire protection engineering concepts after graduation.

IV. Please describe any experience you have with fire protection engineering on a separate sheet. Work or volunteering with a community fire department is one example.

V. Please describe how you are funding your education. Include all known sources of funding in your description.

VI. List any scholarships you have this year.

Scholarship(s): _____ Total: _____

List any scholarships you expect to receive next year.

Scholarship(s): _____ Total: _____
